irisidea

HIGHLIGHTS

Irisidea
Magazine
Vol 1

Editor's Note

We take great pleasure in presenting to you a new edition of our newsletter which we used to publish on a regular basis a few years ago!

This publication has been thoughtfully created to serve as a space for sharing company updates, other information, collaborations, and a touch of fun. Through it, we aim to keep you informed and engaged with all the exciting activities and developments happening around us.

Our vision is to deliver meaningful content that reflects the spirit of our organization — from milestones and team highlights to new initiatives and insights. We are thrilled to have you with us as readers and hope you'll also be inspired to contribute your stories, ideas, and experiences in the issues to come.

Here is the restart of the beginning of a great journey together! You may always participate and improve our next volumes of this magazine.
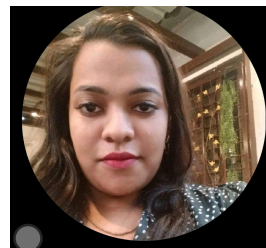

Warm regards,
The Editorial Team
Irisidea TechSolutions

.

Customer, Project & Product

WiSP

- There was a customer visit to our Bangalore Development Center in the month of February and we worked closely with them to improve the current deliverables of Sprint 1-9.
- We successfully released WiSP Pilot during this in March and it was live tested in UCLA.

RouteEye

- We had multiple demos with the current customer and their feedback was incorporated.
- The team kept on improving the current product in terms of quality and features.
- Devices were installed at the customer's site and being tested.

VAR CAPITAL

- Rebuilt their corporate web site and released it by incorporating their feedback.
- Successfully implemented Odoo CRM for their sales and marketing team.

Skill Anything

- Successfully onboarded 3 instructors on our SkillAnything platform, who delivered live training on the platform for 4 different topics.

Infosys

- We made significant progress in successfully creating a remote team for their projects.

Other significant updates

- We worked on a couple of AI based PoC to automate the program management process and detect leaf diseases and which moved to publishing stages.
- There were various prospects moved to next stages during this phase.
